SDHS offers a wide array of educational and community outreach programs:

Our in-class or on-site programs typically run from 40 – 60 minutes and can be geared for any age. All presentations conform to California Education Standards. We offer 6 basic formats with customization available for an additional fee.

A.) Native species of reptiles, amphibians (with a few arachnids and arthropods as they relate to herps.) We always bring a 1 or 2 commonly found invasive species during native talks and discuss their impact on native wildlife during the program.** Cost: \$75 per presentation
Duration: 45 – 60 minutes

B.) Exotic Reptile Species – with hands on encounters with endangered species!** Cost: \$75 per presentation Duration: 45 – 60 minutes

**For hands-on opportunities in these 2 programs we limit class size to 25. If we are selecting only a selected handful of children to interact with, then we can accommodate larger classes.

C.) Amphibians are in global crisis. We face extinction of ½ of the 6000 known species of amphibians in our lifetime! Not since the days of dinosaurs has such a mass species wipe out been faced. We offer a Power Point Talk on the Amphibian Crisis (with or without) live display specimens – as this is a global concern with local impact. We address the 5 key issues impacting amphibian survival in the world today and offer an array of hands-on, get involved type solutions. This program is suitable for assemblies or classrooms. There is no group size limit. Cost: \$100 (Equipment requirement: LCD Projector) Duration 60 minutes – 90 minutes with Q&A session

D.) Field Work – At certain times of the day/year we can also offer field herping (reptile/amphibian observation) opportunities at your location (or other designated locals) – the field opportunities are limited to a maximum of 12 individuals. Cost: To be determined.
Duration: Typically 2 hours.

E.) Education Booths (for community/large scale events) – hosted by San Diego Herpetological Members. Live animals on display with public interactions available with limited species. Cost based on duration of event.

F.) Birthday/Special Occasion Parties hosted at your site – A 45 minute hands-on “educational entertainment” presentation with a special Hands-on Photo and SDHS reptile related gift for the guest of honor. Cost: \$195 Duration: 60 minutes (includes photo-op time for guest of honor)
